Number 1

Mathematical modelling for the practice of ultrasonic inspection
M.A. Sumbatyan and N.V. Boyev 5
Numerical modelling of ultrasonic wave propagation using the efficient p-version finite element method
C.A. Issa, K.S. Iyer and K. Balasubramaniam 13
Propagation of surface waves in anisotropic solids: theoretical calculation and experiment
T.-T. Wu and J.-F. Chai 21
An automated algorithm for simultaneously producing velocity and thickness images
M.S. Hughes and D.K. Hsu 31
Study of vibrational characteristics for piezoelectric sandwich ultrasonic transducers
L. Shuyu and Z. Fucheng 39
Prediction of the temporal shape of an ultrasonic pulse in a photoacoustic sensing application
M. Oksanen and J. Wu 43
Temporal evolution of transient transverse beam profiles in near-field zones
E. Riera-Franco de Sarabia, A. Ramos-Fernández and F. Rodriguez-López 47
Arrays for airborne 100 kHz ultrasound
W.S.H. Munro and C. Wykes 57
An ultrasonic attenuation parameter for investigating the holding power of non-threaded fixation pins in canine femur (*in vitro*)
J.R. Dickens, D.E. Bray and R.H. Palmer 65
The effect of bulk solution temperature on the intensity and spectra of water sonoluminescence
Y.T. Didenko, D.N. Nastich, S.P. Pugach, Y.A. Polovinka and V.I. Kvochka 71

Number 2

Lamb wave tomography of advanced composite laminates containing damage
D.P. Jansen, D.A. Hutchins and J.T. Mottram 83
A learning algorithm for a CMAC-based system and its application for classification of ultrasonic signals
T.R. Damarla and Wei Ning Zhao 91
Effect of active diameter and damping on the performance of ultrasonic transducers
N.D. Patel and P.S. Nicholson 99
Simulated and experimental study of the electric impedance of a piezoelectric element in a viscoelastic medium
I. Perrissin-Fabert and Y. Jayet 107
Enhanced synchronized ultrasonic and flow-field fractionation of suspensions
Z. Mandralis, W. Bolek, W. Burger, E. Benes and D.L. Feke 113
Modelling of the ultrasound return from Albunex microspheres
S. Holm, M. Myhrum and L. Hoff 123
Observation of a very slow ultrasonic bulk compressional wave in an inhomogeneous porous material
T.E. Gómez Alvarez-Arenas, E. Riera-Franco de Sarabia and F.R. Montera de Espinosa-Feijo 131
Experimental study of sound propagation in modelled shallow-water environments
L.S. Wang, N.G. Pace, M.A. Ainslie and C.H. Harrison 141
Modelling and compensation of field distortion due to defective elements in planar ultrasonic arrays
G. Xu and P.S. Nicholson 149
Half-order derivative formulation for the analysis of laser-generated Rayleigh waves
Y.H. Berthelot 153

Number 3

Grain noise power spectrum estimation for weak scattering polycrystalline materials using experimentally estimated backscatter coefficients: normal incidence
M.D. Russell and S.P. Neal 163
Grain noise power spectrum estimation for weak scattering polycrystalline materials using experimentally estimated backscatter coefficients: oblique incidence
M.D. Russell and S.P. Neal 173
Photoacoustic generation in liquids with low optical absorption
K.M. Quan, H.A. MacKenzie, P. Hodgson and G.B. Christison 181
Wiener filtering of laser-generated multiple-pulse narrow-band ultrasound for enhanced detectability by a laser interferometer
J.B. Deaton, Jr and J.W. Wagner 187
Thickness measurement on multilayered structures by SAW dispersion
J. Krause 195
Mass sensitivities of two-layer sagittal plane plate wave sensors
Z. Wang, C.K. Jen and J.D.N. Cheeke 201
Mass sensitivity of two-layer shear horizontal plate wave sensors
Z. Wang, C.K. Jen and J.D.N. Cheeke 209
Experimental and theoretical investigations of SiO_2-aerogel matched piezo-transducers
O. Krauß, R. Gerlach and J. Fricke 217
Natural frequencies of two spherical bubbles Near a solid wall
T. Fujiwara and A. Shima 223
Acoustical emissions from bubble clouds
D.P. Koller and P.M. Shankar 229
Peculiarities in strengthening of Nb and Ta due to superimposed ultrasonic and plastic deformation
A.V. Kozlov 235

Number 4

Visualization of Lamb mode patterns in a glass plate
Hyo Ung Li and K. Negishi 243
Dispersion curve analysis of laser-generated Lamb waves
R.D. Costley, Jr and Y.H. Berthelot 249
Lamb waves in microstructued plates
D.E. Chimenti 255
Characterization of composite prepreg with gas-coupled ultrasonics
D.E. Chimenti and C.M. Fortunko 261
Distributed source photoacoustic generation of ultrasound
T. Sun, H.X. Chen and G.J. Diebold 265
An efficient driver for electromagneto-acoustic transducers with a switch-mode high voltage supply
Z. Filus 271
Oblique sound transmission through tube bundles and tube gratings
M.A. Heckl 275
Amplitude transfer function technique for defect classification
J.B. Santos and J.M. Perdigão 287
Verification of the physical basis of acoustothermography

REPRINTS

We offer a reprints service in respect of all articles in this journal.

Companies: an article featuring your product or a new application provides its readers with an independent authoritative comment. Reprints can be used by you to inform and educate your customers and staff about scientific or technical advances in subjects relevant to your business. They are a cost-effective, ethical way of promoting your company and its products.
